EDUCATION

Vellore Institute of Technology, Bhopal

2027

B.Tech in Computer Science Engineering (Health Informatics)

CGPA – 9.17

EXPERIENCE

Web Development Intern

May 1, 2025 – Jun 15, 2025

Ace Infoway Pvt. Ltd.

- Completed a structured onboarding into web development, building a strong foundation in ReactJS – including component architecture, JSX, props, hooks (`useEffect`, `useRef`, `useCallback`), custom hooks, the Virtual DOM, and Fiber reconciliation.
- Studied state management and routing through Context API, Redux Toolkit, and React Router, and explored backend integration using Appwrite for authentication, database operations, and file storage.
- Practiced production-oriented development with Tailwind CSS, React Hook Form, and debugging real-world issues such as CORS, while building multiple guided React projects to reinforce concepts.

PROJECTS

ClientLens – AI Meeting Assistant (RAG Pipeline)

Node.js, Express, React, LangChain.js, ChromaDB

- Built the retrieval-augmented pipeline for a live meeting assistant: transcript summarisation into structured JSON, embedding generation, and semantic search over a vector database with metadata filtering – secured 3rd place at Ace Infoway's internal AI Hackathon.
- Implemented Express REST endpoints (`/search`, `/suggest`) for ranked semantic retrieval and a React dashboard displaying matched meetings with summaries and confidence scores.

Parkinson's Disease Detection Using SVM

Python, Scikit-learn, Pandas, Matplotlib

- Built an SVM-based model from voice features achieving 94.87% test accuracy; performed preprocessing, correlation analysis, and metric visualisation.

Skin Cancer Classification Using CNN

Python, PyTorch, ResNet50, HAM10000 Dataset

- Built a ResNet50-based classifier on the HAM10000 dermoscopic dataset; handled class imbalance with weighted loss functions, achieving 87% test accuracy.
- Designed modular PyTorch code with gradient clipping and F1/precision/recall evaluation; optimised for telemedicine and clinical decision support deployment.

SKILLS

Languages: Python, C/C++, JavaScript

Frameworks: TensorFlow, PyTorch, Scikit-learn, Keras, OpenCV, Seaborn

Web Dev: React.js, Node.js, Express, Redux Toolkit, Context API, React Router, Tailwind CSS, React Hook Form

Database: MySQL

Tools: AWS

CERTIFICATIONS

[Blockchain And Its Application](#)

NPTEL

[The Bits and Bytes of Computer Networking](#)

Coursera

[AI Hackathon – 3rd Place](#)

Ace Infoway Pvt. Ltd.

ACHIEVEMENTS

- Secured **3rd place** in the AI Hackathon held at Ace Infoway Pvt. Ltd. during internship
- Achieved top 5% ranking in *Blockchain And Its Application* on NPTEL
- Solved 250+ data structures and algorithms problems across LeetCode, GeeksforGeeks, and Codeforces

EXTRACURRICULARS

- **Trekking** – Completed high-altitude treks: Kedarkantha (12,500 ft) and Hampta Pass (14,560 ft)
- **Football** – Played at regional level
